Digital whiteboarding for hybrid teams

Teams work better when ideas are freely shared

webex
by CISCO

"The Webex Board has everything teams need to collaborate, including intuitive whiteboarding, high-quality video conferencing, and integrated web applications. From our evaluation, the Webex Board is best in class for every deployment scenario and has everything you need to bring people together and inspire creativity."

Vaishno Srinivasan
Industry Analyst, Information &
Communications Technologies
Frost & Sullivan

With Webex,

you can harness the collective power of teams to get stuff done. Everyone can participate live wherever they are at home, in a local coworking space or in a meeting room.

Explore concepts, create designs, and engage in group problem-solving on an infinite canvas using your preferred device, whether that's a smartphone, tablet, laptop, Webex® Desk Mini, Webex Desk, Webex Desk Pro, or Webex Board Pro.

When the meeting is over, take your ideas with you. Webex safely and securely stores your creations so you can access your whiteboards wherever and whenever inspiration strikes.

Webex devices

Designed to bring ideas to life

Creative collaboration isn't confined to the office. Keep ideas flowing while your teams are apart with Webex. In-person and remote teams can simultaneously ideate, iterate, and collaborate on content and whiteboards while you work face-to-face with high-quality video conferencing.

You and your team can work and brainstorm together effortlessly and keep your ideas flowing without ever running out of space to capture them. Need to see the detail? No problem. Pinch and zoom—you'll never have to miss a thing.

Digital whiteboarding powers all types of teamwork–from anywhere

Table 1. Features & Benefits

Feature	Benefit
Brainstorming	Gather teams to generate ideas or problem-solve. The digital whiteboard lets teams brainstorm in a freeform fashion on an infinite canvas.
Agile teams	Agile teams can quickly access their favorite project management tool through integrated web apps and draw, annotate, or share ideas seamlessly.
Education and distance learning	The physical blackboard has has its limitations. With Webex, you can instruct students with the digital whiteboard where your files are saved and can be shared with the entire class after the session. Bring in experts from around the world to share their knowledge with students.
Design teams	Co-create on design files with remote teams and bring new concepts to life. Use the dedicated stylus and touch-based pinch and zoom for details and precision. With seamless integration into 3rd party design and collaboration applications, such as CAD software, Miro, and MURAL, teams can easily collaborate using the tools they love.
Ideation and co-creation	Share ideas and collaborate across distances without the fear of losing your work. Your creations are automatically saved in Webex or choose to email them to anyone.
Healthcare	Make remote care personal. Webex devices provide medical practitioners with the ability to extend an exceptional remote care experience, connect with experts for a second opinion, and allow for easy content sharing and annotation.

Features of the Webex Board and Webex Desk Series

The Webex devices portfolio runs on RoomOS, which delivers the same, seamless collaboration experience across devices and spaces, from the personal office to the meeting room. The following capabilities are available on Webex Board Series and Webex Desk Series all-in-one devices, powered by RoomOS:

Pervasive, digital whiteboard

Easily whiteboard with the dedicated stylus or your finger and your content is automatically saved to a Webex virtual space. Multiple people can whiteboard at the same time—in the room or remotely with Webex.

Video conferencing

Unlike other collaboration displays, Webex devices are designed to deliver a face-to-face experience that rivals in-person meetings. With high-quality video and audio, your whiteboarding session isn't just about the whiteboard—it's about bringing people together around an idea.

Wireless sharing

No wires, no problem. Share content locally in the room or remotely, without any need for cables, dongles, or adapters.

Annotation

Working on a piece of content or design files? Share the content and bring the team together to gather ideas, mark up changes, or iterate on your project.

Stickies

No more searching your phone for photos of easels and brainstorming notes. With digital stickies, you can create the perfect project plan and continue to ideate with the ability to easily move, add, and delete stickies. Every brainstorming session becomes evergreen, ever-inspirational.

Web apps

Save time by launching web apps directly from the home screen with the push of a button. Add your most commonly used applications like O365, Trello, or project management software with the option to share and annotate on the content during meetings.

webex by CISCO

Companion mode

The best of both worlds

Companion mode provides a video-first whiteboarding and content sharing experience. In companion mode, a Webex Room Series device, which are video systems without touch capabilities, and a Webex Board work seamlessly together as a combined system.

You can use the Webex Room Series device device to connect remote participants and use the Webex Board for whiteboarding. Content is shown on both devices, and the whiteboards are shared automatically in meetings.

Keep the ideas flowing with Webex

Transform the way you collaborate

Inspiration can happen anywhere, anytime, and outside of the four walls of the office. When ideas strike, you need the tools and technology to capture it, share it, and iterate on the idea.

With Webex you can create or open a whiteboard from a previous session whether that session was hosted on a Webex Desk Mini, Webex Desk, Webex Desk Pro, Webex Board, or the Webex App. Interact with the whiteboard to share your ideas as they come to you. As you work, your changes are saved automatically and your whiteboard is added to the list of whiteboards in the space. You can access the Webex App from your mobile device, tablet, or laptop—anytime, anywhere.

Secure and scalable

With Webex by Cisco you get end-to-end encryption. This means your data remains encrypted with a key that you own—from the moment any data leaves your machine up until it gets to the recipient's device. You can put this key into your own data center and it remains totally secure within your control, managed and accessible by you. All messages, files, whiteboards, and actions are encrypted, whether in transit, at rest, and even in use. While other solutions offer things like "bring your own key" or "encryption at rest," Webex is the only vendor that offers encryption end to end.

Cloud and on-premises registration for devices makes it affordable and easy to deploy in any space. And with Webex Control Hub, you can manage your devices and spaces with analytics to continually optimize your spaces.

Digital signage

As an added benefit, Webex devices can be used to display digital signage. Digital signage allows you to show custom content when the devices are not being actively used. It's a great way to display adoption tips and provide information that is important to the workforce, including upcoming town hall dates, company calendars, and critical alerts.
